

Integrated Cross-Experiment Evidence Map

Seven experiment threads are unified into a single impact-stability narrative with explicit quantitative ranking.

Integrated score = 0.50 x Impact + 0.50 x Stability; scales: Δ quantum/5, separation x120, gain x3.5, sensitivity impact = 0.6*F1ret + 0.4*(0.5 + 5*(Q-C)).

A. Impact-Stability Constellation

B. Evidence Ranking and Metrics
